

XENON FLEX STRIP KIT

ETL/CSA/CE Listed.
Designed to
conform with
UL2108 and
NEC411 codes

Description: Ordering Kit with Specification Guide will include all lamps/bulbs, correct size transformer and complete kit hardware for installation. Xenon low-voltage flexible linear light strip made of 10-gauge copper wire with clear insulation and white high-temperature Polycarbonate. Lamp sockets with twin weather-proof stainless steel spring clips. Lamp spacing 2.25" (5.75cm) on center with 5.3 sockets per foot. Maximum load 25 amps; 24V/600W or 12V/300W (transformer required). Using 24 volt allows twice the length as 12 volt. Fully dimmable, field-cutable and flexible up to 90 degrees. May be made rigid with C-Channel (sold separately).

Applications: Indoor or damp locations. Cove lighting, accent toe kicks, undercabinet, display cases, awnings.

Lamp: Frosted Xenon Festoon 3W or 5W; 12V or 24V (included)

Wattage: 3W or 5W per socket; 16W or 28W per foot

Average Lamp Life :
3W - 10,000 Hrs
5W - 20,000 Hrs

Dimmer: Low voltage magnetic or electronic

Dimensions: .75" (1.9cm) wide and 1" (2.5cm) high

Kit Includes: Specified length of Flex Strip in feet with Xenon lamps included, correct size transformer, L-Straps, Splice Box and End Cap
