

**T-600-D12****LOW VOLTAGE WIRE SIZE CHART**

Use to decide the correct copper wire size for a recommended 3 percent voltage drop. The length shown is the length of wire from the transformer to the power feed canopy/J-Box.

12 Volt	5 ft. (1.5m)	6-15 ft. (1.8-4.6m)	16-20 ft. (4.9-6.1m)	21-40 ft. (6.4-12.2m)
300 Watt	#10 GA	#6 GA	#4 GA	#1 GA

Description:

600 watt remote mount magnetic transformer converts line voltage input to two low voltage 300 watt, 12 volt outputs for powering Monorail or Cable Lite low voltage lighting system. Not separately switchable or dimmable and must be used with a dual power feed canopy (sold separately). Protected by fast acting secondary circuit breaker. For other input voltage, see ordering code below.

Installation:

The remote mount transformer must be installed in an accessible location (such as an attic or in a closet). To prevent voltage drop it is best to keep transformer within 20 ft of power canopy/junction box. The electrician must supply the correct gauge wire from the transformer to the power feed/junction box location based on the length of conductor. See Low Voltage Wire Size Chart above.

Dimming:

A 1000 watt magnetic low voltage dimmer must be used when dimming is desired. The dimmer is powered on the line voltage side of the transformer. Some buzzing may occur on low levels and may be reduced with a dimming de-buzzing coil (TDB-600), sold separately.

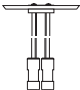

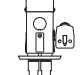

Weight:

17.42 lb (7.90 kg)
