

X-COVE SQUARE SYSTEM

Description: Xenon X-Cove Sq system offers a unique fusion of a low voltage Flex Strip with 3 or 5 watt warm Xenon lamps in a low profile (less than 2.5" from the wall) aluminum extruded cove. With the Flex Strip socket spacing at 2.25" the cove system creates a warm indirect light that can easily be dimmed with a standard low voltage dimmer with no dark spots between lamps. With a remote 600 watts transformer and the 3 watt 24 volt xenon lamps (10,000 hr life) @ 16 watts per foot, the system may be run 37 feet before re-feeding. With the 5 watt 24 volt lamps (20,000 hrs) @ 27 watts per foot, the system can be run 22 feet before a new electrical feed. ETL Listed. ADA.

Body Finish: Powder Finish Flat White Painted Aluminum

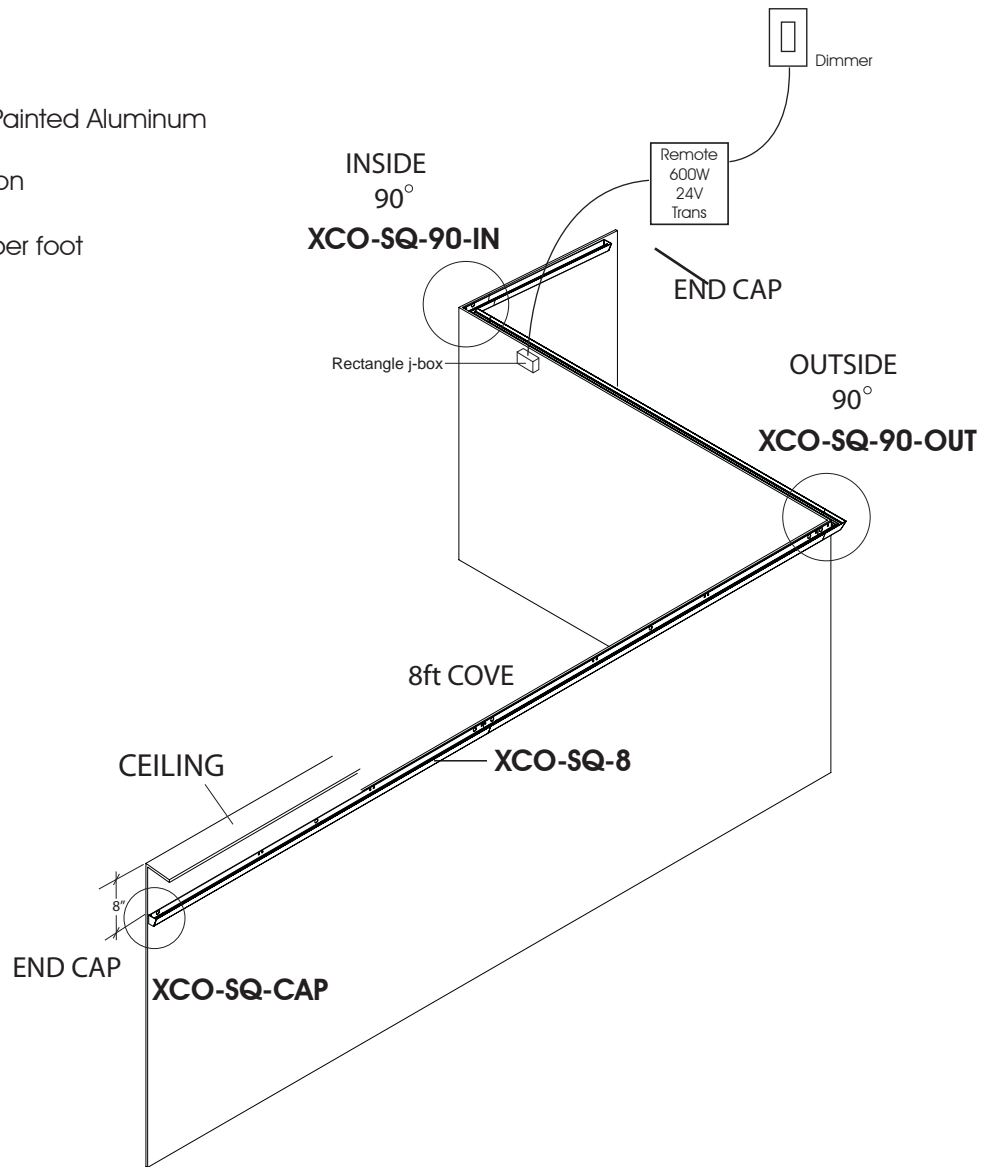

Lamp: Incandescent 24V Festoon

Wattage: 3W or 5W - 16W or 37W per foot

Dimmer: Low Voltage Magnetic

Weight:

8FT COVE: XCO-SQ-8
END CAP: XCO-SQ-CAP
INSIDE 90: XCO-SQ-90-IN
OUTSIDE 90: XCO-SQ-90-OUT
