- This product is ETL listed for indoor dry locations.

SAVE THESE INSTRUCTIONS!

**Install the Canopy**

A

1: Remove the fourteen #8-32 screws around the canopy to remove the mounting plate.

2: Feed the power wires through mounting plate center hole.

3: Align the mounting plate slots with the electrical box holes and secure it to the electrical box holes with the provided two #8-32 screws.

**NOTE:** It is recommended that a person to hold the mounting plate while the electrician installs it.

B

4: Tap the anchors through the mounting plate holes onto the marked point up to the threaded portion with a hammer.

5: Screw in the threaded portion of the anchors with a Phillips screwdriver.

**NOTE:** All 4 anchors must be installed to balance the pendants weight.
6: Secure the mounting plate to the anchors with the provided #8 screws and washers.

7: Make sure that the mounting plate is grounded in accordance with local electrical codes.

**NOTE:** Make sure a person holds the Fast Jack canopy while the electrician connects the wires and completes the installation.

8: Connect the Fast Jack white canopy wire to the neutral power wire with a wire nut.

9: Connect the Fast Jack black canopy wire to the hot power wire with a wire nut.

**Installing Fixture on Canopy**

1: Unscrew the bottom portion of the fixture to attach lamp.

2: Insert LED lamp into 2-pronged socket, and re-attach the bottom portion of the fixture.

**NOTE:** Do not loosen or otherwise modify the power cable set screw. This will cause damage to the fixture.

3: Feed the coaxial cable through the glass shade, and rest the glass shade over the socket assembly.
5: Loosen the two M4 set screw on base of the coaxial fixture connector with the 2mm Allen wrench provided. Do not remove these set screws.

6: Remove the M3 set screw on tip of the connector with the 1.5mm Allen wrench provided.

7: Feed the coaxial cable through the conical nipple and flared side of the strain relief tube. Slide the conical nipple and strain relief tube down the coaxial cable.

8: Feed the coaxial cable into the coaxial fixture connector. The coaxial cable will come to a stop point.

9: Keep feeding the coaxial cable in until the inner wire is visible in the screw hole of the fixture connector tip. The outer metal jacket will start to wrinkle.

10: Hold the fixture connector in place. Replace and tighten the M3 set screw on fixture connector tip with the 1.5mm Allen wrench.

11: Pull down the outer metal jacket to smooth the wrinkles.
12: Push the strain relief tube completely into the coaxial fixture connector. Make sure the slot on the strain relief tube is not inline with the M4 set screw.

13: Tighten the two M4 set screws with the 2mm Allen wrench.

14: Use fingers to tighten each Fast Jack fixture connector into one Fast Jack canopy port.

**CAUTION:** Maximum load of each port is 20 watt. Use only fixtures that are rated 20 Watt or less, or relamp each fixture with a Maximum 20 watt lamp.
