Installing CDP Panel

A

CONTROLLER POWER SUPPLY

120 NEUTRAL

120 HOT

DEEP SINGLE GANG BOX

WALL

NOTE: Before beginning any electrical work, ensure that power to the electrical box is turned off.

NOTE: This product requires deep double gang electrical box.
1: Connect the brown and blue wires of the 24VDC transformer to the 120 volt hot and neutral wires with wire nuts respectively.

2: Place the controller power supply inside the double gang box.

ELECTRICAL BOX
DMX CABLE (BELDEN #9841)

CONDUIT

POWER SUPPLY

NOTE: Refer to the "Configuring DimWheel" & "Operating DimWheel" for help on programming the Dimwheel.

5: Connect the red wire of the power supply to the "VDC+" terminal of the controller.

6: Connect the black wire of the power supply to the "Ground" terminal of the controller.

7: Run the blue and brown line voltage wires coming from the controller power supply to the power supply case.

8: Install conduits from controller, main panel (line voltage), and soft strip to power supply.

9: Run proper DMX cable **(Belden #9841 recommended)** with three data wires from controller to the power supply box.
D

DVR-RGB-60

POWER SUPPLY

NOTE: "DMX in+", "DMX in-", "EXT in+" & "EXT in-", controller terminals are not used on controller.

10: Install a red wire from the power supply to DVR-RGB-60 "VDC+" red terminal and a black wire from power supply to DVR-RGB-60 "VDC-" blue terminal.

11: Connect one end of a data wire (blue with white stripes wire) to controller "LEDSYNC OUT–" terminal. Connect the other end into the DVR-RGB-60 "DMX in –" terminal.

12: Connect one end of a data wire (white with blue stripes wire) to controller "LEDSYNC OUT+" terminal. Connect the other end into the DVR-RGB-60 "DMX in +" terminal.

13: Connect one end of a data wire (bare shield wire) to controller "LEDSYNC SHIELD" terminal. Connect the other end into the DVR-RGB-60 "DMX in shield" terminal.

NOTE: For assistance wiring a fixture to LED Driver reference fixture installation instructions.
