

**Description:**

LED power supplies transform and regulate power from a line voltage power source into low voltage power for use with LED lighting. The PSB-400W-24VDC power supply accepts input voltage ranging from 120/240 volts AC and outputs 24 volt DC power up to 400 watts. The integrated RGB Driver receives signals from CDP, CTP, CDMX1-RGBW, or CDMX1-2XK to control RGB color mixing and light intensity. Power Supply features short circuit and overload protection.

Applications:**Indoor***

*To avoid overheating the power supply, install it in a ventilated remote location where air flows. Maintain proper spacing among power supplies when multiple power supplies are installed in the same remote location.
